The bill creates a notification requirement under the "Victim Rights Act" that requires a law enforcement agency to notify a victim at least once every 90 days if the law enforcement agency has not received the results of the forensic medical evidence DNA analysis from an accredited crime laboratory.

The bill requires an accredited crime laboratory to endeavor to analyze forensic medical evidence within 60 days after its receipt.

The bill expands existing reporting requirements concerning forensic medical evidence in sexual assault cases so that each member of the general assembly receives a report twice each year and the report includes information concerning the average amount of time between receipt and completed analysis of sexual assault evidence collection kits.
