habitat of the state trust lands.

The bill requires the executive director of the department of natural resources (department) to convene a state trust lands conservation and recreation work group (work group) to study opportunities to advance conservation and recreation activities on state trust lands as part of the state board's long-term stewardship of the state trust lands while maintaining the state board's fiduciary responsibilities regarding its management of the state trust lands. On or before July 1, 2026, the work group is required to make recommendations to the state board, the governor, the general assembly, and the executive director of the department based on the study.

On or before December 15, 2026, the state board is required to take into consideration the work group's recommendations and adopt an administrative policy or rules to establish a process and policy regarding the state board's implementation of conservation leases while balancing such conservation efforts with the requirement to generate revenue from the state trust lands.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) The state board of land commissioners serves as the trustee of
5 lands granted to the state in public trust by the federal government, lands
6 acquired in lieu thereof, and additional lands held by the state board in
7 public trust, which lands are commonly referred to as "state trust lands";

8 (b) The state board of land commissioners manages 2.8 million
9 surface acres and 4 million subsurface acres, making it the second largest
10 landowner in the state behind the federal government;

11 (c) As trustee of the state trust lands, the state board of land
12 commissioners' management of state trust lands provides vital funding for
13 public schools;

14 (d) Under federal law and under section 10 of article IX of the
15 state constitution, state trust lands shall be managed exclusively for the
16 benefit of the designated beneficiaries of the trusts;

1 (e) Conservation; outdoor recreation; contributions to reducing
2 emissions and addressing climate change through the development of
3 transmission and renewable energy generation on state trust lands; and
4 housing for teachers, educators, school employees, and families with
5 children may all be identified as forms of benefits to the trust
6 beneficiaries;

7 (f) In 1996, the registered voters of this state approved
8 amendments to sections 3, 9, and 10 of article IX of the state constitution
9 to make changes to the state board of land commissioners' composition
10 and mandate. Among other matters, the amendments to section 10 of
11 article IX did the following:

12 (I) Clarified the state board's authority to manage and promote the
13 long-term yields of state trust lands by changing the state board's mandate
14 to "produc[ing] reasonable and consistent income over time";

15 (II) Articulated a vision for the state board's management of all
16 state trust lands, stating that "the economic productivity of all lands held
17 in public trust is dependent on sound stewardship, including protecting
18 and enhancing the beauty, natural values, open space[,] and wildlife
19 habitat thereof, for this and future generations";

20 (III) To fulfill in part the direction to "protect and enhance the
21 long-term productivity and sound stewardship" of all state trust lands,
22 directed the state board to, among other activities:

23 (A) Establish and maintain "a long-term stewardship trust of up
24 to 300,000 acres of land";

25 (B) Manage the development and utilization of natural resources
26 "in a manner which will conserve the long-term value of such resources,
27 as well as existing and future uses"; and

1 (C) Sell or lease "conservation easements, licenses[,] and other
2 similar interests in land".

3

4 (2) The general assembly further finds and declares that:

5 (a) As the state approaches its 150th anniversary on August 1,
6 2026, there are opportunities to further implement the intent of section 10
7 of article IX of the state constitution by continuing to diversify revenue
8 streams to the benefit of the trust beneficiaries, both through revenue and
9 in-kind, in a way that protects Colorado's great outdoors, wildlife, and
10 recreational opportunities, which are among the state's most treasured
11 resources, thus enhancing Coloradans' quality of life, bringing prosperity
12 to the state and its residents, and representing the fabric of the state;

13

14 (b) It is reasonable to encourage the state board of land
15 commissioners, in exercising the state board's discretion to determine the
16 best interests of its beneficiaries, to consider additional
17 revenue-generating, non-revenue-generating, and in-kind contributions,
18 including conservation and recreational opportunities, renewable energy
19 siting and energy transmission, housing, and broadband infrastructure;

20 (c) Furthermore, the state board of land commissioners should
21 consider opportunities to expand conservation, restoration, and
22 sustainably managed public access to state trust lands, including for
23 communities that face systemic barriers to accessing nature, renewable
24 energy siting and energy transmission, and housing, while:

25 (I) Protecting natural and conservation values;

26 (II) Maintaining the state board's fiduciary duties; and

27 (III) Respecting the rights of existing lessees; and

1 (d) The state board of land commissioners has generated
2 significant and important revenue for the public beneficiaries of the state
3 trust lands. The state board of land commissioners can meet its
4 constitutional mandates to provide reasonable and consistent revenue to
5 trust beneficiaries and to preserve the future economic potential of the
6 treasured underlying asset base by continuing existing uses and protecting
7 and enhancing the natural values of state trust lands and providing
8 high-quality, sustainable, and equitable public recreational access,
9 renewable energy and energy transmission siting, and housing, where
10 appropriate.
